

Bakytbek (Beck) Tatibekov

Senior Software Engineer • AI / LLM Application Development

New York, NY | (917) 376-3763 | bakytbek.tatibekov@gmail.com | linkedin.com/in/tatibekov

SUMMARY

Senior Software Engineer with 7+ years shipping production web and mobile applications across enterprise platforms, now focused on building AI-powered features at scale. Hands-on with LLM orchestration (LangChain, LangGraph, AWS Bedrock), RAG pipelines with vector databases, and prompt engineering — combined with deep full-stack expertise in React / React Native, Node.js, TypeScript, and AWS serverless. Track record of architecting BFF layers and integrating conversational AI into customer-facing systems at Ingram Micro, Elevance Health, and Anthem.

TECHNICAL SKILLS

AI / ML Engineering: LLM orchestration with LangChain, LangGraph, LlamaIndex; LLM integration via AWS Bedrock (Claude, Vertex); RAG with Pinecone, FAISS, OpenSearch; evaluation & observability with LangSmith, Weights & Biases, Helicone; Vercel AI SDK; prompt engineering

Agentic Development: Claude Code with Superpowers (TDD / planning / systematic debugging skills framework), /grill-me (design stress-testing), GSD (Get Shit Done) plugin for safe codebase extension, MCP servers, sub-agent orchestration, CLAUDE.md-driven workflows

Frontend: React, React Native, Next.js, Redux (Saga / Thunk), TypeScript, JavaScript (ES6+), MUI, Ant Design, Styled Components, HTML/CSS, Flexbox/Grid

Backend: Node.js, Express, GraphQL (Apollo Server / Client), REST APIs, BFF architecture, MongoDB, DynamoDB

Cloud & DevOps: AWS (Lambda, API Gateway, DynamoDB, S3, Bedrock, CloudWatch, IAM, CloudFormation), Azure DevOps, Serverless, CI/CD with CodePipeline / CodeBuild

Mobile: React Native, native iOS (XCode), Android (Android Studio), App Store & Google Play deployment

Tools: Git, GitHub, BitBucket, Jira, Confluence, Figma, Jest, Detox, Agile / Scrum

PROFESSIONAL EXPERIENCE

Ingram Micro — Senior Software Engineer

Jul 2024 – Present

Accounts and Apps • Remote

- Architected **AI-powered features** using AWS Bedrock Agents and foundation models (Claude, Vertex), shipping personalized recommendations and automated summarization used by internal engineering teams.
- Built **RAG pipelines** with vector databases for context-aware information retrieval; designed prompt evaluation workflows to monitor output quality and reduce hallucinations.
- Integrated AI capabilities to deliver real-time image analysis and natural language understanding features into platform products.
- Designed and implemented a **BFF layer** in Node.js / Express with GraphQL (Apollo), consolidating responses across microservices into frontend-ready data and decoupling UI teams from backend release cycles.
- Led migration of legacy services to React + TypeScript, improving type safety, code maintainability, and onboarding time for new engineers.

Elevance Health — Senior Software Engineer

Dec 2022 – Jul 2024

Broker Portal • Remote

- Architected **conversational AI solutions** using AWS Bedrock Agents on the Broker Portal, automating intelligent process workflows for thousands of brokers.
- Built scalable **BFF layer** with Node.js, TypeScript, and GraphQL (Apollo Server), reducing API response latency by 60% and cutting cold-start times in critical broker-facing workflows.
- Designed serverless backend on AWS Lambda, API Gateway, and DynamoDB to support both Producer Toolbox (web) and Broker Plus (React Native iOS / Android) from a shared API surface.
- Established CI/CD pipelines using AWS CodePipeline / CodeBuild and instrumented CloudWatch dashboards, improving deployment cadence and production observability.

Shipped to: *Producer Toolbox (brokerportal.anthem.com) • Broker Plus (App Store & Google Play)*

College Board — Software Engineer

TDTK • Remote • via Mindlance

Jul 2022 – Dec 2022

- Built responsive, accessible React UI components for the TDTK platform, integrating with GraphQL backend services.
- Optimized rendering performance and a11y compliance across the application, improving Lighthouse scores and reducing Time-to-Interactive.

Anthem Blue Cross Blue Shield — Senior Software Engineer

Broker Portal & Provider Finder • Richmond, VA • via UST Global / E-Solutions

Jul 2019 – Jul 2022

- Designed and shipped reusable UI component libraries and middleware packages (authenticators, token validators) as modular NPM packages with Yarn Workspaces, adopted across Broker Portal and Provider Finder to reduce duplication and dependency drift.
- Contributed React Native features to Sydney Health, the consumer-facing mobile app on App Store and Google Play, used by millions of Anthem members.
- Migrated backend logic to AWS, modernizing legacy systems and adding security layers (MPT) for enterprise releases.

Walmart — Web & Mobile Applications Developer

FixIt, Express Returns, Asset MDN, Trace • Bentonville, AR • via Tata Consultancy Services

Jul 2018 – Jul 2019

- Built and shipped native iOS / Android apps (FixIt, Express Returns) for store associates, enabling order creation, payments, monitoring, and operational workflows at scale.
- Developed Node.js BFF middleware bridging web / mobile clients and microservices, reducing client-side complexity and improving response times through targeted caching.
- Designed secure payment flows for Express Returns (Sam's Club), ensuring compliance with industry standards and safeguarding user data.
- Integrated React with Microsoft Power BI dashboards for Asset MDN, delivering real-time analytics and interactive visualizations.

SELECTED PROJECTS (IN PRODUCTION)

Validation Ledger — Founder & Engineer

Identity continuity platform for fraud prevention in US freight

July 2025 – Present

- Architected and shipped a **cross-platform native mobile platform** targeting double brokering, chameleon carrier schemes, and fictitious pickups — three of the most damaging fraud vectors in the trucking industry.
- Built native iOS (Swift) and Android (Kotlin) clients in parallel — chose native over cross-platform to meet security / biometric / performance / camera / fingerprinting requirements that React Native couldn't satisfy.
- Designed high-throughput Node.js / Fastify backend with PostgreSQL, leveraging relational integrity and transactional guarantees for carrier identity records and verification audit trails.

MoveIn — Founder & Engineer

3D virtual tours for real estate listings

Mar 2026 – Present

- Designed and shipped a React Native mobile app delivering **interactive 3D property tours** for buyers and renters — letting users walk through apartments and homes virtually before scheduling visits. Backed by Node.js / Express + MongoDB on Railway with Stripe payments; iterated through multiple releases in the first month on filters, validation, and listing UX.

Shipped to: moveinplatform.com • App Store • Google Play

CarEx — Founder & Engineer

Mobile marketplace for buying and selling cars

Feb 2026 – Present

- Built end-to-end mobile marketplace with React Native, Node.js / Express, MongoDB, and Stripe — covering listings, advanced listing options, buyer-seller messaging via WhatsApp / Telegram, and secure transactions. Shipped 7 versions in the first 10 weeks; localized for English and Russian users.

Shipped to: carexmarket.com • App Store • Google Play
